OPTIONAL ADDITIONAL INFORMATION SUPPORTING NJD (e.g., discussion may include information reviewed to assess potential navigation or interstate commerce connections - 1 to 3 paragraphs): This site contains an approximately 0.27-acre depressional wetland that appears to be an old stream meander bounded on the north by a road. Site may have been historically wetter, but offsite hydrology from the south has been redirected. Remaining wetlands are located in low spots within old meander. There is no defined hydrologic connection between this feature and Ditch No. 9.
